### BIO-OXI

**Stabilising peroxide based agent with oxidant and disinfectant effect for impact treatment of the swimming pool water.**

Special, stabilised peroxide based formula to be used to treat water in the swimming pool, guaranteeing the complete destruction of bacteria and organic substances in the pool.

### BIOSAN

**An anti-bacterial and anti-algae mixture with a polymeric and natural biopolymer base for treating water in the swimming pool.**

Biosan is an agent with strong algicide and disinfecting effect which aims to keep your swimming pool clean and perfectly disinfected.

### BIOACID

**pH acid corrector for swimming pools with a buffered inorganic acid and mineral salt base. With magnesium and potassium.**

Its special balanced formula reduces the presence of organic pollutants and keeps bacterial flora and algae under control, preventing the formation of biofilm and limescale deposits on the filtering mechanisms. Its strong buffering effect dramatically reduces consumption compared to any other buffered product.

### BLU DELUXE

**Very high concentration algicide that is particularly suitable for non-foaming summer swimming pools with an optical brightener and lightener effect.**

The high concentration of active principles and their synergic action prevents and combats the algae that act against the fungi and bacteria. Its action is extensive in combating the infesting micro flora and in particular on black algae, micro algae and macro algae.

**Production workshop authorised by the ministry of Health: Via S. Allende 14 - 41051 Castelnuovo Randone (MO)**  
Offices and warehouses: via della Tecnica 8 - 41051 Castelnuovo Rangone (Modena) - Italy
