

BIOVITRUM AG+

BIOVITRUM TI

BioVitr^{um}

THE NEW FILTERING FRONTIER

Innovative filter media with **technological titanium and silver coatings.**

BioVitrum Ag⁺

TECHNICAL SPECIFICATIONS AND QUALITIES

- *A technological coating of self-cleaning titanium with the addition of germicidal and bacteriostatic silver.*
- *Germicidal and bacteriostatic: BioVitrum Ag+ aids all conventional disinfection processes and prevents the development of hazardous pockets of bacteria and the formation of biofilm in the filter.*
- *Cannot be attacked by bacteria: BioVitrum Ag+ guarantees excellent long-lasting filtering quality because its silver coating is permanently fixed to the surface of the filter media and is immune to attack by the chemical agents found in the water.*
- *Packed in 25 kg bags.*

BioVitrum Ti

TECHNICAL SPECIFICATIONS AND QUALITIES

- *Technological coating of self-cleaning titanium.*
- *Remains permanently fixed to the surface of the filter media and is immune to attack by the chemicals found in the water.*
- *Self-cleaning: By virtue of a catalytic reaction, the titanium makes Biovitrum self-cleaning and prevents the adhesion of dirt and grease and the formation of Biofilm inside the filter.*
- *Less frequent backwashing and reduced filter maintenance.*
- *Exceptional long-lasting filter efficiency; better water quality.*
- *Packed in 25 kg bags.*
